

## **BROADBLUE CATAMARANS**

### **ENDORSEMENTS**

#### **Yachting Monthly, Broadblue 385 (November 2005)**

“This is not just another cat, she is a thoroughly modern creation fitted out to a much higher standard than most. A boat for the discerning cruising multihull sailor”.

#### **Yachting Monthly, Broadblue 385, Top 100 Boats of the Century (June 2006)**

“Proving that fully fitted interiors in catamarans don’t necessarily mean stodgy performance, this boat is a very attractive alternative to designs that have proved so popular in the charter market”.

#### **Mr. Rod Carr OBE, Broadblue Catamaran owner (Chairman of the RYA)**

“Broadblue’s craftsmanship and attention to detail is second to none; their ability to accommodate specific customer requirements is impressive and stems from their vast collective experience in building quality catamarans.

Our catamaran has met all our expectations and more. She is stylish, comfortable and has good performance under sail and power. The systems all work satisfactorily and the few teething problems we have had have been promptly dealt with.

Having spent over a year trawling through websites, reviews and sailing prospective boats, we are delighted with our choice and can’t wait for the new season to start”.

#### **Jon Ely, United Kingdom Sailing Academy, Broadblue Catamaran owners**

“We looked at a number of catamarans on the market, but the Broadblue Catamaran stood out in its build quality and the company’s ability to customise the interior to suit our needs. We are also very confident that the after sales service offered by Rob Underwood and his team at Broadblue will provide the support which is required for an extremely hard working boat. Our fleet is out on the water every day, with each yacht having an average daily mileage of 43 miles, which is a punishing schedule and leaves little time for being out of commission. We are delighted to be associated with a British built product of the quality and look forward to a long relationship with the Broadblue Company”.

#### **Kevin Crane, Broadblue 385 Owner (July 2006)**

Cruise to Channel Islands, crossed at 7.5 knots average. Family enjoying holiday. This is what the Broadblue 385 does well.
